# Who am I?

My name is Nela Rindová. I am a Spanish teacher, an ICT in Education student, and an AI enthusiast. I am passionate about helping fellow educators simplify their lesson planning and improve classroom experiences using ChatGPT.

**Nela Rindová**

# Part 1: Planning a Complete Lesson Using ChatGPT

## Why?

- Save significant time by automating repetitive planning tasks.
- Generate creative teaching ideas and activities you might not have thought of before.

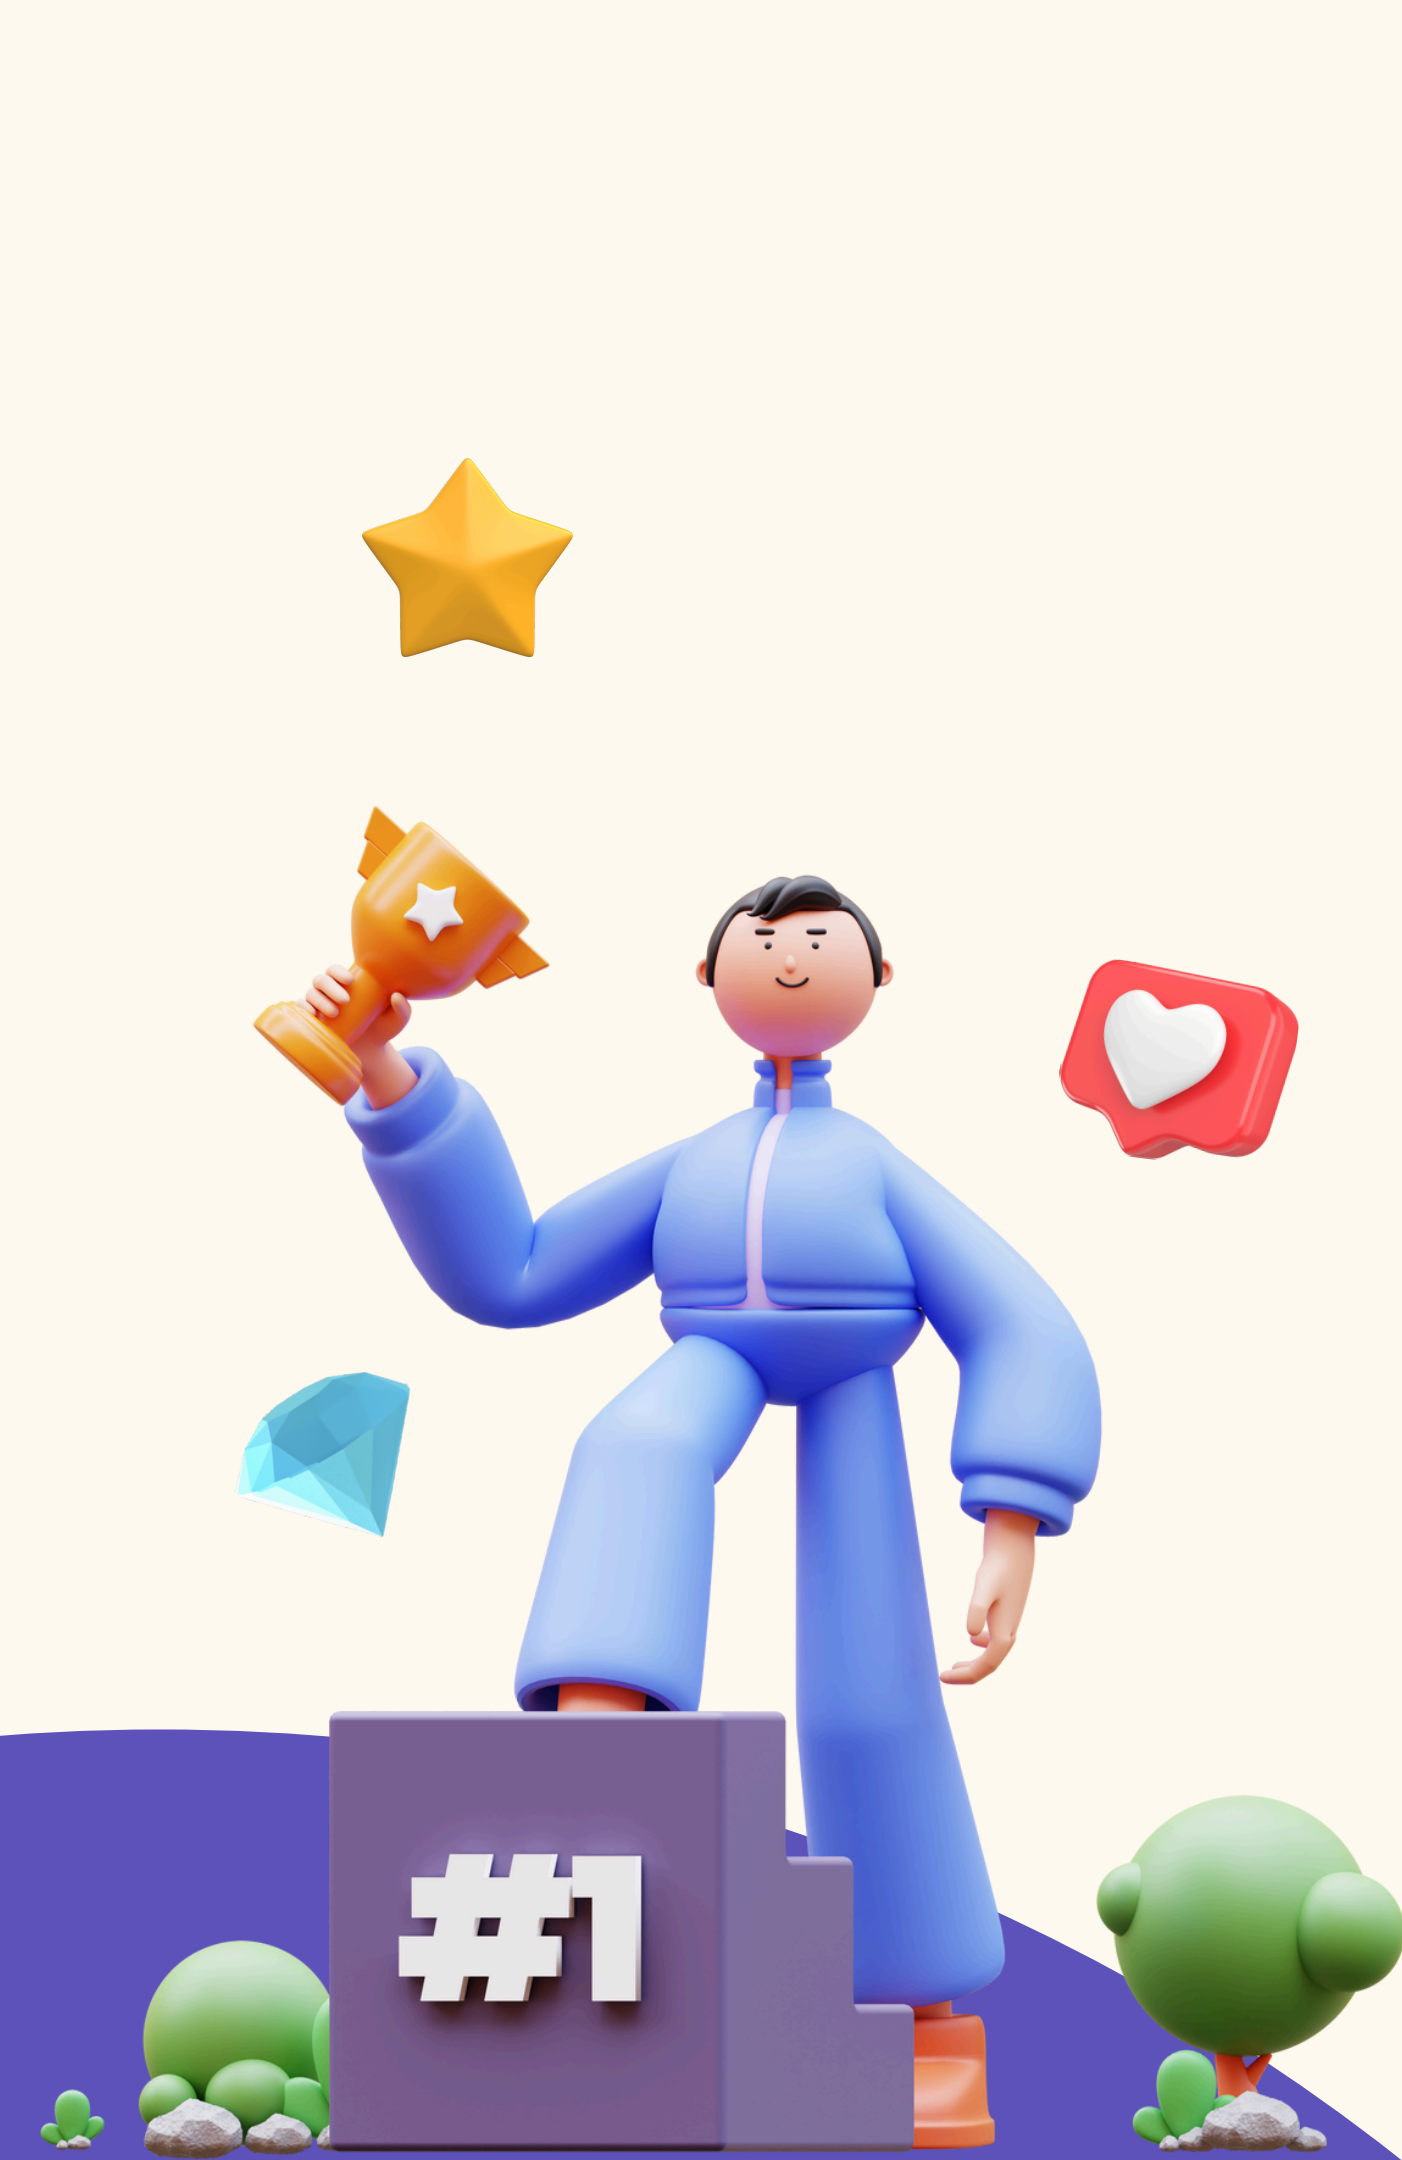

# How to create an effective prompt #1

"You are a Spanish teacher. Help me create a 45-minute lesson plan for a high school Spanish class on the topic of 'Reflexive Verbs in Daily Routines.' Include a warm-up activity, a main teaching segment, a practice task, and a closing reflection."

# Activity #1

**Now it's your turn!**

**Write your own prompt and test it in ChatGPT.**

**After that, share your prompt in the group chat, get inspired and inspire others.**

# Part 2: Making Difficult Topics Engaging

Why use ChatGPT for the challenging topics? Because it can:

**Offer fresh ideas, turning dull content into interactive experiences.**

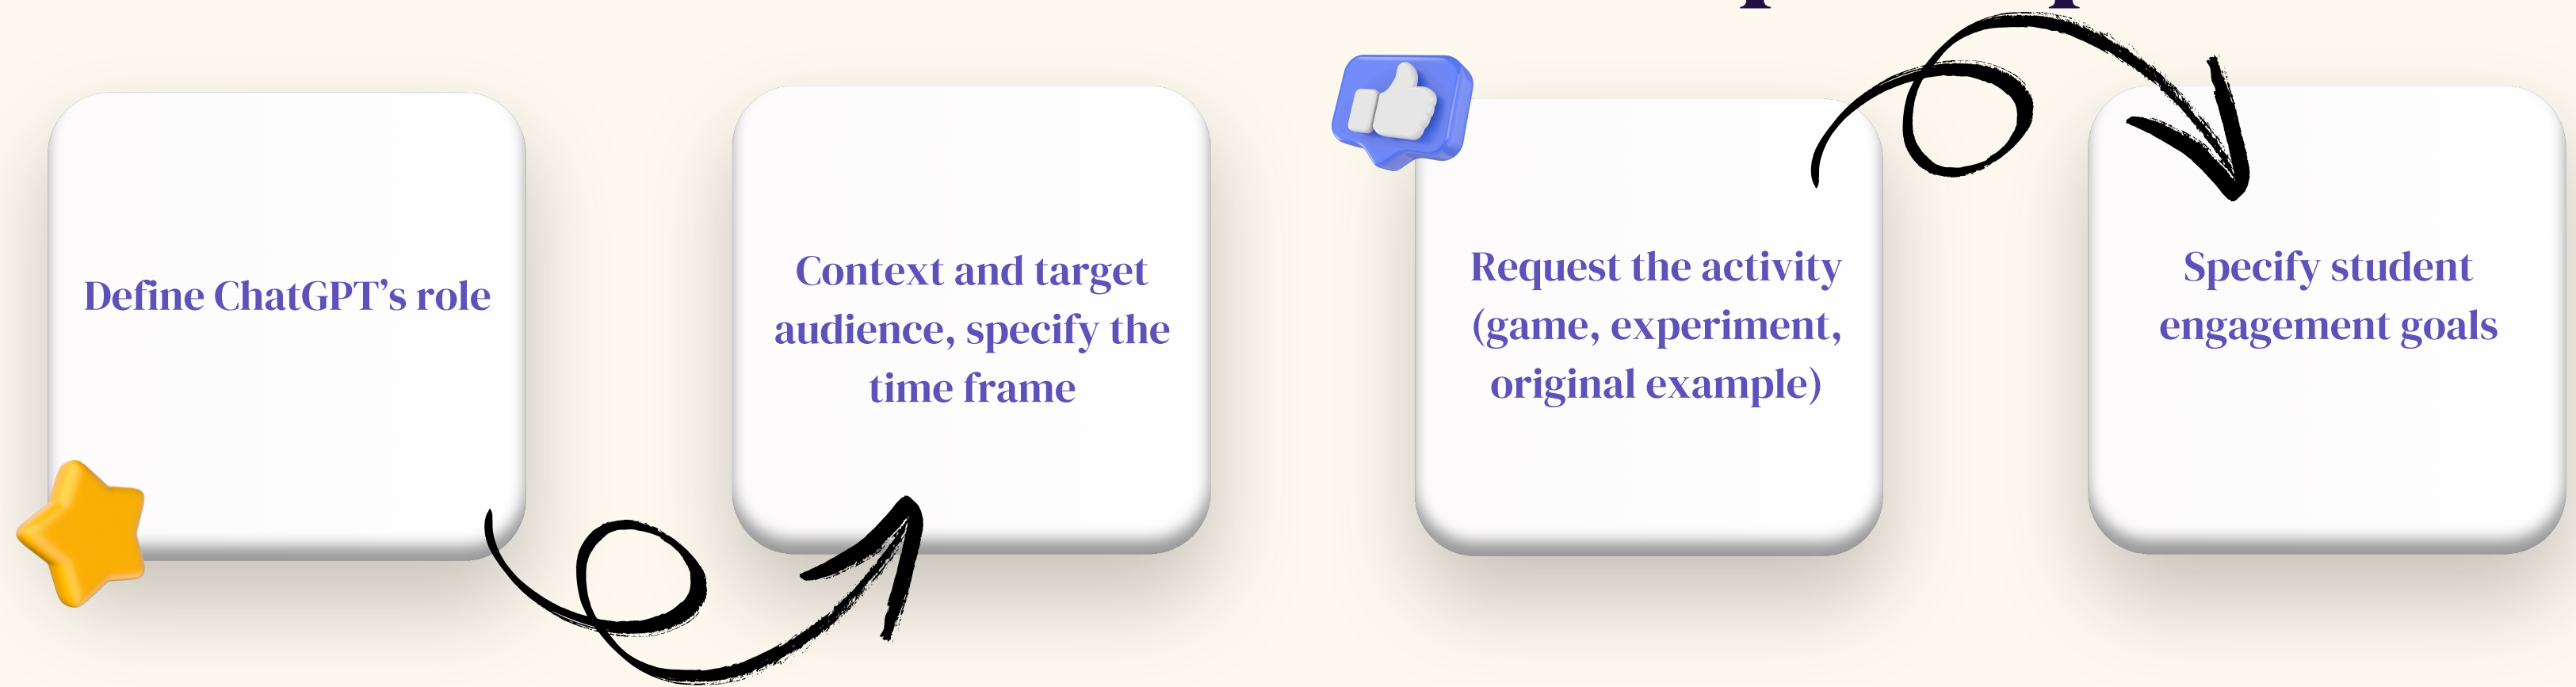

**Suggest innovative examples, games, or experiments to spark student interest.**

**Help you overcome creative blocks and bring a new perspective to familiar material.**

# How to create an effective prompt #2

"You are a Biology teacher. Help me design a fun and engaging classroom activity for teaching high school students the principles of photosynthesis. Create an interactive game that illustrates key concepts, encourages student participation and will take no more than 10 minutes."

# Activity #2

Now it's your turn!

Write your own prompt and test it in ChatGPT.

After that, let's discuss how using ChatGPT influenced your lesson planning.

- *What worked well? Were the ideas useful?*
- *What do you recommend for others?*

# Start today!

Download the worksheet, get inspiration for creating functional prompts and reflect on what working with AI has brought you or how it could be improved.
